Mission Briefing

Salvage Operation: The Halcyon Drift
Fleet Command

Situation

The freighter Halcyon Drift went silent eleven days ago, while hauling medical supplies to the Carrow colonies. A long-range scan shows her drifting, intact, with her reactor still running.

> Your shuttle docks with a dull clang. Beyond the airlock, the corridor lights flicker in a slow, regular pattern, as if something is signalling.

Objectives

Mission Objectives

Priority	Objective	Reward
Primary	Recover the ship's flight recorder.	5,000 cr
Secondary	Secure the cargo of medical supplies.	2,000 cr
Optional	Learn what happened to the crew.	—

Hazards

Boarding parties should expect vacuum in the cargo bay, and a damaged reactor. Each hour spent in the engine room deals 1d6 radiation damage.

Fleet Command Advises

Do not open the medical bay until the flight recorder has been recovered.
